

PS&T COMMITTEE AGENDA

July 2, 2015 - North Conference Room

21630 11th Avenue South – Des Moines 98198

5:30P – 6:50P

1. Approval of minutes of 4/02/2015 meeting

2. CIP Updates

(Informational Item – 45 min)

Staff will update Committee on the current CIP active projects this year and/or planned for the second half of 2015. This will include an update on the Boardwalk Repair project based on information known at this time.

3. Transportation CIP

(Discussion Item – 45 min)

Staff will present a draft Transportation CIP for years 2016-2021. Council Adoption of the overall 6-year CIP for the City is currently scheduled for July 9th.

Draft Des Moines City Council PS&T Committee Minutes – 4/02/2015

Meeting called to order: 5:49 PM on April 2, 2015, in North Conference Room @ 21630 11th Avenue S, Des Moines WA 98198.

Council Members

Vic Pennington - Chair
Dave Kaplan
Jeanette Burrage

Other City Staff

Tony Piasecki – City Manager
Dan Brewer – Planning, Building & PW Director
Brandon Carver – Engineering Services Manager
Andrew Merges – Associate Engineer
Grant Fredricks – Special Projects Consultant
Peggy Volin – Admin Asst II

AGENDA:

1. Approval of Minutes from 3/05/2015 meeting
2. Sound Transit Update
3. Draft Transportation Improvement Plan

MEETING:

1. Approval of Minutes from 3/05/2015 meeting: Unanimously approved.
2. Sound Transit Update: Mayor Kaplan updated the Committee on his meetings with the mayors of the cities of SeaTac, Federal Way and Kent on Sound Transit's FWLE alignment and station locations. Staff then updated the Committee with news that a hard copy of the DEIS was received just that afternoon and the electronic version will be available online by April 10. The City is holding an open house on April 30, before the Council meeting to hear citizen concerns and finalize its comments on the DEIS that are expected to be due on May 18th. These comments will assist Sound Transit staff and then its full Board in identifying a "Preferred Alternative" tentatively in June that will be further refined and analyzed before the Board makes a final decision on what project to build in the summer of 2016.
3. Draft Transportation Improvement Plan: Engineering Services Manager, Brandon Carver and Associate Engineer, Andrew Merges went over the proposed changes to the 2016 - 2035 Transportation Improvement Plan (TIP) which included: proposing to elevate the Redondo Boardwalk Repairs to 2 from 26; and Redondo Way Sidewalk Project to 15 from 35. They proposed adding three new projects: Redondo Area Parking Project @ 21; Boardwalk Marine Pile Corrosion Protection Project @ 22; and Wooten Park Access and Parking Improvements @ 36. They finished up by proposing to remove the

following three projects from the list as they will be completed in 2015: item #4 - 24th Avenue South Improvement (Segment 2); item #8 - Citywide Arterial Street Improvements; and item #10 - the Saltwater Bridge Repairs and Seismic Retrofit.

Adjourned 6:52 pm

Minutes submitted by:

Transportation CIP Updates - Active or Completed Projects for 2015

Completed CIP Projects in 2015	Status/Comment
24th Avenue South (208th - 216th)	Substantial completion issued April
Saltwater State Park Bridge Seismic Retro-fit	Bridge opened 5/28
Redondo Parking Management Plan	Final report to Council 6/25
Current Active or Planned CIP Projects in 2015	Status/Comment
Redondo Boardwalk Repairs	Design underway, seeking funding for construction
216th Segment 1a (24th - SR-99)	In ROW acquisition phase
Pavement Management Program	Developing a small project for patch repairs - repairs est. in August
Citywide Arterial Safety Improvements	Final year of 3 year markings and sign upgrade project - work underway
Barnes Creek Trail	Design underway, approximately at 30%
Annual Sidewalk Program	Developing a list of locations for repair in late summer/fall 2015
South 268th Street Sidewalks (SRTS)	Intend to start design later summer/fall 2015
South 224th Street (Pac Hwy - 30th Ave S)	Intend to start design fall 2015
24th Ave South - Midway Elementary Sidewalks	Design slowly underway, project delayed to 2015, in-house resources
Projects staff will be applying for grant funding in 2015:	Comment
Redondo Boardwalk Repairs	Likely need to apply for TIB funding
South 216th Segment 3 (11th - 18th)	Will request TIB funding
MVD/South 240th St - Intersection	Will request TIB funding

20-yr

Redondo Boardwalk Repair Alternative 1

8729 Commerce Place Drive, Suite A
Lacey, WA, 98516

Date: 6/23/2015

SUMMARY OF ALTERNATIVE 1

The boardwalk in Des Moines, WA will be repaired to be put it back into service for safe use by the public. The timber deck will be completely replaced with new timber decking. Stringers, girders, and rail elements that were storm damaged or otherwise in poor condition will be replaced with new material. The exterior stringer line will be completely replaced due to deficient load bearing capacity. Below is a sketch from the replacement. All hardware and connection elements in the boardwalk framing will be replaced. The expected service life for this alternative is 20-30 yrs. The limiting factors for this service life is the remaining service life of the existing timber members, piles, and galvanized brackets.

Redondo Boardwalk Repair Alternative 2

8729 Commerce Place Drive, Suite A
Lacey, WA, 98516

Date: 6/23/2015

SUMMARY OF ALTERNATIVE 2

The boardwalk in De Moines, WA will be repaired to be put it back into service for safe use by the public. The timber deck will be completely replaced with new concrete decking. Stringers, girders, and rail elements that are storm damaged or otherwise poor condition will be replaced with new material. The exterior stringer line will be completely replaced due to deficient load bearing capacity. Below is a sketch of the replacement. All hardware and connection elements in the boardwalk framing will be replaced. The expected service life for this alternative is 20-30 yrs. The limiting factors for this service life is the remaining service life of the existing timber members, piles, and the new galvanized brackets.

**Redondo Boardwalk Repair
Alternative 3**

8729 Commerce Place Drive, Suite A
Lacey, WA, 98516

Date: 6/23/2015

SUMMARY OF ALTERNATIVE 3

The boardwalk in De Moines, WA will be rebuilt to be put it back into service for safe use by the public. The timber members and connections will be completely replaced with new concrete structure. The piles will be encapsulated from the top to 2 feet below the ground line. The expected service life for this alternative is 50+ yrs. The limiting factors for the service life is the remaining service life of existing piles and the sea wall. If the encapsulation is not done during this rehabilitation the service life will be reduced by as much as half.

RE: 2016-2021 CAPITAL IMPROVEMENTS PLAN

Introduction

Attached is a working draft of the 2016-201 Capital Improvements Plan for your review and consideration. All amounts are in thousands. Thus a project estimated to cost \$425,000 will be listed as \$425. The list of project expenditures starts on page 8. The list of funding sources and which projects will use each funding source starts on page 11. The listing of projects contain the page number where detailed description of the proposed work as well as the explanation/justification as to why the work is a priority. This document shares some features of the past format and some features are different.

Changes and Process

The most fundamental difference is that this process will result in a document and a PLAN which is adopted by council in the summer. This PLAN provides the building blocks for the capital BUDGET that will be adopted later this year along with the Operating Budget.

Each area of the city creates an inventory of facilities related to its programs usually through a master plan process (such as for Parks), rate setting process (such as for SWM and Marina) or an annual review (such as the TIP for transportation). This view is often a **20 year** view. The inventory and long term plans are prioritized and then available funding is considered. Based on estimated available funding the highest priority projects are brought forward to be included in the six year 2016-201 Capital Improvements Plan process. Thus this plan does not represent a "wish list" nor does it reflect all urgent capital needs, but rather it is designed to reflect the hard choices made to realistically identify priorities of spending identifiable, scarce resources. This plan represents a **6 year** view. The six year plan though no longer a budget, remains a financial document. All continuing capital projects and the projects authorized by the Plan Year 2016 column in the 2016-2021 Capital Improvements Plan (which have full available funding) will be included for consideration as part of the 2016 Capital Budget. The 2016 Capital Budget creates authorized spending appropriations for the next year; a **1 year** view of capital spending.

Another change is major maintenance projects to maintain existing facilities (>\$25,000) have also been included. This change creates added visibility of these significant spending plans and provides an additional mechanism for council input on importance and priority.

REET funding is separated into the first quarter % (REET 1) and the second quarter % (REET 2) as separate sources as state law contains different spending restrictions. A change from the past is REET 2 now is devoted to paying existing, on-going capital related debt. Debt has the first claim on REET before projects, but it is estimated the future REET 2 will be adequate to meet future debt service requirements.

Thus the REET 1 is what is available for funding new capital projects and only the REET 1 is listed in the 2016-2021 Capital Improvements Plan.

Highlights, Analysis and Goals

Though the attached document is in the new final document format, the information and projects reflect a preliminary, work in process, first draft. The attached document currently contains more projects than anticipated available funding in some areas.

The goal for the committee is to provide guidance as to project priority (and possibly project scope). Of particular challenge is the REET 1 funding as it has the fewest restrictions on spending. It can be used for a variety of capital (and maintenance) projects relating to streets, trails, parks and administrative facilities. As this committee looks to prioritize the projects, it may wish to remain mindful that trail & transportation projects are also seeking REET 1 funding (see page 11). There is not enough to cover all requests. Only, approximately \$490,000 of future annual REET 1 funding is estimated. Since there is not sufficient resources available for REET 1 funded projects all of the projects are listed in 2017 in Director priority order and are waiting for council's priority guidance. The final 2016-2021 Capital Improvements Plan will eliminate those projects not selected by council. If a project was listed as 100% grant funded, then the funding source could be changed from REET 1 and the project remain in the plan as the understanding would be no budget authority would be granted until the grant was awarded. If a grant requires a significant (more than 20%) match from REET 1, then for planning purposes and to ensure REET 1 does not get over committed, the project is considered to be fully REET 1 funded.

Some of the projects listed may be appropriate (or necessary) for debt financing. The Paid Parking projects may be able to be done through internal debt financing with the debt repaid through parking revenue. The risk inherent in this approach is if actual parking revenues do not materialize as estimated. By keeping the debt funding internal, it is easier to renegotiate the terms of the loan if needed. The source of the interfund loan would be Surface Water Management Operations fund balance.

The North Lot & Beach Park Bulkheads project is so large (\$2.3 million) external debt financing will most likely be required. If external debt is planned, there are two different approaches to consider. The first is to wait until 2018 which is when the current City Hall Addition debt will be paid off. Replacement Councilmanic debt could be issued with REET 2 continuing to be devoted to debt service. The City Hall bond will free up about \$120K annual debt service capacity. A 20 year, 5% bond for the full amount of the Bulkheads project is likely to run about \$186K per year.

If council decides to issue debt for the North Lot & Beach Park Bulkheads project, rather than issuing Councilmanic debt it could consider a Voter Approved bond issuance. This would create a special property tax levy in addition to the regular property tax levy. If this approach is considered, council may also wish to consider including a variety of other popular parks projects for which no other funding is available and asking the voters for a larger, more comprehensive bond (and special property tax levy). Debt service on a \$5.5 million 20 year, 5% bond is likely to run about \$441K per year.

Ayn Rand

INTRODUCTION

This document is the City of Des Moines's 2016 –2021 Capital Improvement Plan. The Capital Improvement Plan provides a multi-year list of proposed major capital and major repair expenditures for the city. This plan attempts to set funding strategies not only for the current year, but also for the next five years to project future needs for major construction, land acquisition and equipment needs that improve the cultural environment, capital infrastructure and recreational opportunities for the citizens of Des Moines. Capital expenditures are viewed not only in the context of how much the new project will cost, but also what impact the project will have on the city's operating budget.

OVERVIEW

Capital facilities planning and financing is subject to the State of Washington Growth Management Act of 1990 (GMA). The GMA requires communities to adopt comprehensive plans designed to guide the orderly development of growth over the next twenty years.

In accordance with GMA, the city has prepared its 2016-2021 Capital Improvement Plan ("CIP"). This plan provides long-range policy guidance for the development of capital improvements and identification of major repairs to accommodate orderly growth, set policy direction for capital improvements and ensure that needed capital facilities are provided in a timely manner.

The GMA requires the following elements in long term capital planning:

1. An inventory of existing publicly-owned capital facilities showing locations and capacities.
2. A forecast of the future needs for such capital facilities.
3. The proposed locations and capacities of expanded or new capital facilities.
4. A minimum six-year plan that will finance such capital facilities within projected funding capacities and clearly identifies sources of public money for such purposes.
5. A requirement to reassess the land-use element if probable funding falls short of meeting existing needs.

The 2016-2021 CIP is the result of step 4 listed above.

For financial and accounting purposes, municipal capital and operating funds are divided into two broad categories: general governmental and proprietary. General governmental activities are supported primarily by taxes and user fees, while proprietary activities rely primarily on fees generated from the sale of goods and services for their operations. Capital improvements for police, parks, and transportation are traditionally general governmental in nature, while those for surface water and marina are proprietary.

Revenue sources for general governmental capital improvements are constrained by legal limits on tax rates that can be charged to raise funds for capital improvements, and on the amount of general obligation debt (capacity) that can be issued to raise funds for capital improvements. Proprietary funds' revenue sources are less restricted in that user fees could be increased or revenue-backed debt issued with the approval of the legislative body.

In addition, general governmental capital funding for improvements that rely on voter-approved bond issues creates uncertainty of when or if certain projects will take place.

CIP PROJECT CRITERIA

Capital expenditures include expenditures for buildings, land, major equipment, and other commodities that are of significant value (greater than \$25,000) and have a useful life of at least five years. Anticipated major repairs/maintenance greater than \$25,000 have also been included. The next year of capital spending and projects which do not meet the capital criteria are included in the annual Operating Budget.

The Capital Improvement Plan (CIP) lists each proposed project to be undertaken, the year in which it will be started, the amount expected to be expended in each year and the proposed method of financing these expenditures. Based on these details, summaries of project activities in each year can be prepared, as well as summaries of financial requirements, such as amounts of general obligation bonds to be issued, amounts of general operation funds required and any anticipated intergovernmental support, etc.

The capital improvement budget is enacted annually based on the capital improvement plan. It appropriates funding for the projects in the first year of the capital improvement plan as well as any projects started but not yet complete.

Flexibility is built into the capital improvement plan to allow for delay of projects when financing constraints make it impossible to allow for funding of the entire array of projects and to move future projects forward when financial availability makes it possible. The CIP is updated at least annually.

WHY PLAN FOR CAPITAL FACILITIES?

Project planning provides several advantages to the community:

- It facilitates repair or replacement of existing facilities before they fail. Failure is almost always more costly, time- consuming and disruptive than planned repair or replacement.
- It focuses community and the City Council's attention to priorities, goals, needs and capabilities. There are always more needs and competing projects than available funds. A good project plan forces the city to consciously set priorities between competing projects and interests.
- It provides a framework for decisions about community growth and development. Long-range planning for infrastructure needs allows the community to accommodate reasonable growth in new facilities while maintaining existing infrastructure, based on goals established through the planning process.
- It promotes a more efficient government operation. Coordination of projects can minimize disruption and reduce scheduling problems and conflicts between several projects. Related projects, such as sidewalks, drainage and roads, can be planned simultaneously.
- It helps distribute costs more equitably over a longer period of time, avoiding the need to impose spikes in tax financing. For example, new projects can be scheduled as current debt levels decline.
- It enhances opportunities for outside financial assistance. Adequate lead time allows for the opportunity to explore all avenues of outside grant funding with federal, state, and local financial assistance programs.

- It serves as an effective community education tool in conveying to the public that the City Council has made decisions that affect the future of the city and in its implementation provides guidance for development of the community.

FINANCIAL POLICIES & REVENUE SOURCES

The City Council has adopted policies that encourage fiscal responsibility while establishing reliable sources of funding for project expenditures on an ongoing basis. Described below are policies and revenues sources which support the CIP process.

Revenue Policies and Sources

- In 2012, City Council adopted Ordinance No. 1561, which defined one-time revenues and restricts the use of one-time revenues to fund municipal capital improvements projects.
- Rate studies in proprietary funds are conducted periodically to determine the adequacy of user charges and annual contributions for capital improvements. The Marina underwent a rate studies in 2006 and the Surface Water Management Utility completed its latest rate study in 2015. The City Council adopted Ordinance No. XXX , implementing a three-year phased-in approach of rate increases as proposed by the Surface Water Management Utility Rate Study. In 2007, the City Council approved Resolution No. 1028 adopting increases in Marina rates for through 2009. Subsequent rate changes for both the Marina and the Surface Water Management Utility are based on the CPI inflation index.
- Park in-lieu fees from single-family subdivisions and multi-family developments are used for the acquisition and development of neighborhood parks determined necessary as a consequence of the proposed development, or for designated community parks.
- Transportation Impact Fees are used to pay for past and future payments of capital expenditures for growth related transportation improvements and are also available to repay the debt service on bonds or loans financed for growth related transportation improvements
- Twenty-five percent (25%) of vehicle fuel tax revenues will be transferred annually from the Street Fund to the Transportation Capital Improvement Fund for transportation capital improvements. This requirement was suspended for 2015 by Res. 1280, which adopted the 2015-2020 CIP.

Debt Management Policies:

- The city shall determine the most advantageous financing method for all new projects. Whenever possible, the city shall identify alternative sources of funding and shall examine the availability of all sources in order to minimize the level of debt.
- Pay-as-you-go financing of capital improvements shall be utilized whenever possible.
- The city shall utilize intergovernmental contribution, when available, to finance capital improvements that are consistent with the goals and priorities of the city.

- The scheduled maturities of long-term obligations shall not exceed the expected useful life of the capital project or asset financed.

CAPITAL IMPROVEMENT PLAN PROCESS

The capital improvement plan process is built around the following eight steps:

1. *Establish administrative and policy framework for capital programming and budgeting.* The first step in implementing an effective capital improvement planning and budget process is to establish the underlying organizational and policy framework within which the process operates. All requests for capital improvement projects are submitted to the Finance Department.

2. *Prepare inventory of existing facilities.* Each governmental unit compiles an inventory of its own physical plant. This helps to indicate the eventual need for renewal, replacements, expansion or retirement of some of the physical plant. This often is accomplished through a master plan process.

3. *Review the status of on-going projects.* The estimated costs of these projects are reviewed to ensure accuracy and monitor the funding necessary to complete the project.

4. *Perform financial analysis and financial programming.* Financial analysis involves the determination of the City of Des Moines' financial capability for major expenditures by examining past, present and future revenue, expenditures and municipal debt. The selection and scheduling of funding sources of these major expenditures is known as financial programming. Some of the important objectives of financial programming include:

- Smoothing the tax rate impacts
- Maintaining a preferred balance of debt service and current expenditures
- Determining debt capacity and appropriate debt service levels
- Maximizing intergovernmental aid relative to local expenditures

The intent is to come up with a level of project expenditures which the municipality can safely afford over the next several years while maintaining a minimal impact of the property tax rate and other municipal revenues.

5. *Compile and evaluate project requests.* Once the Finance Department has completed reviewing and summarizing the CIP requests, the CIP requests are then presented to the City Council Committees (Environment: Surface Water Management Capital Projects; Municipal Facilities: Parks, Administrative and Maintenance Facilities, and Marina Capital Projects; Public Safety and Transportation: Transportation Capital Projects) for review and prioritization based on the criteria contained in the Capital Project Criteria section.

6. *Adopt of the capital program and budget.* The City Council as a whole, reviews, modifies and adopts the Capital Improvement Plan in the summer. Continuing projects plus projects listed in the CIP to start the next fiscal year are included in the Capital Project Budget which council adopts (along with the Operating Budget) before the end of the current year.

7. *Monitoring the Capital Project Budget.* Monitoring the approved capital project budget requires appropriate actions from the Finance Department. Since capital projects often involve time-consuming activities such as bidding, site selection, and lengthy purchasing and construction delays, the actual implementation of projects may be completed somewhat later than the designated year. If funds are incomplete, it may be desirable to split the project over two funding years. An example of this would be completing the Engineering design and bid specification development in one year and the actual construction in the second year.

8. *Modifications.* Significant change in project scope, time or costs requires a budget amendment by the City Council.

CAPITAL PROJECT EVALUATION CRITERIA

Legal. A State or Federal mandate may require a project be implemented. Court orders and judgments concerning annexation property owners' rights, environmental protection, etc. are examples of legal requirements which may affect project prioritization.

Safety. Benefit to the environment, safety or public health of the community is evaluated. For example, all street projects concern public safety, but streets for which documented evidence of existing safety hazards are given higher priority.

Comprehensive Plan. Consistency with the city's Comprehensive Plan is important. Capital projects may directly or indirectly relate to comprehensive plan and should be consistent with the comprehensive plan.

Funding. The extent to which outside funding is available for a project or purchase is evaluated.

Related Project. Sometimes projects in one category are essential to the success of those in others. Related projects proposed by other departments or governmental jurisdictions may even affect a savings to a particular project. Coordination of street projects with utility programs within the city (or those planned by other jurisdictions) can reduce costs and minimize public inconvenience. A surface water line replacement needed in three years may be given a higher priority in order to coincide with a street resurfacing project needed immediately.

Efficiencies. Projects which substantially improve the quality of service at the same operating cost, or eliminate obsolete and inefficient facilities, or lower operating costs are given higher priority.

Economic Impact. A project may affect the local economy. Increases or decreases in property valuations may occur. Rapid growth in the area may increase the city's land acquisition costs if the project is deferred.

Public Support. Projects are generally more easily implemented if there is public demand and support for them.

“Each of us is carving a stone, erecting a column,
or cutting a piece of stained glass in the construction
of something much bigger than ourselves.”

Adrienne Clarkson

INDIVIDUAL PROJECT DETAIL

N. Lot Fishing Pier Paid Parking

CITY OF DES MOINES

N. Lot Fishing Pier Paid Parking	310
----------------------------------	-----

Managing Department: Marina

Justification/Benefits: The parking lots on the Marina floor are used by thousands of people each year. They come from all over King County to enjoy the scenery, the beach, the park and the Des Moines Creek Trail. The parking lot is also used for parking, location of community events as well as overflow parking for the events held at the Beach Park facilities. Paid parking is an option to pay for the capital and maintenance requirements.

Redondo Paid Parking

CITY OF DES MOINES
2016 -2021 CAPITAL IMPROVEMENT PLAN
 (Amount in Thousands)

Redondo Paid Parking	310	Summary Project Description:
CIP Category: Waterfront Facility Project		Equip the Redondo parking lot with an automated pay parking system including gates, ticket dispensers and a pay station.
Managing Department: Marina		

Justification/Benefits: Currently this lot operates a seasonal (June - September) "Pay & Display parking system. This type of parking depends on regular enforcement to make it effective and fair to all who use the lot. Upgrading the lot to a "Pay on Leaving" system where a paid ticket is needed to exit the lot will cut enforcement costs and effectively make the lot a year round operation. Collecting fees all year would increase revenues to help pay for the year round costs of maintaining the facility.

City Hall Generator

**CITY OF DES MOINES
2016 -2021 CAPITAL IMPROVEMENT PLAN
(Amount in Thousands)**

City Hall Generator	310	Summary Project Description:
		Install a new optional 400 Kw standby generator behind City Hall.

CIP Category: Building Facility Project
Managing Department: Plan, Build & PW Admin

Justification/Benefits: The 2006 winter storm season was rather severe. City Hall and Engineering were not operational at times. This optional standby generator will help city staff perform their vital functions during emergency conditions and keep City Hall open to the public.

City Hall Parking Lot

City Hall Parking Lot	310	Summary Project Description:
CIP Category: Building Facility Project		Rebuild southern and eastern City Hall parking lots. The existing southern ecology block wall will be rebuilt prior to parking lot construction work.
Managing Department: Plan, Build & PW Admin		

Justification/Benefits: A design for these parking lots was completed in 2007. The results of the design were that an overlay would be insufficient to solve the existing degradation. As a result, a total rebuild of these parking lots needs to take place.

Council Chambers Lighting

**CITY OF DES MOINES
2016-2021 CAPITAL IMPROVEMENT PLAN
(Amount in Thousands)**

Council Chambers Lighting	506	Summary Project Description:
		Improve lighting in Council Chambers.

CIP Category: Building Facility Project

Managing Department: Plan, Build & PW Admin

Justification/Benefits: The new lighting is necessary now that the new video recording system has been installed. The new lighting will remove the shadowing on the speakers and Council members and will provide a better quality recording for viewers.

Engineer Bldg Windows

**CITY OF DES MOINES
2016 -2021 CAPITAL IMPROVEMENT PLAN
(Amount in Thousands)**

Engineer Bldg Windows	506	Summary Project Description:
CIP Category: Building Facility Project		Replace upstairs windows and Information Systems' windows.
Managing Department: Plan, Build & PW Admin		

Justification/Benefits: The existing single pane windows are not energy efficient, most do not have screens to keep the bugs out and some are extremely had to open and close. New energy efficient windows would save on energy costs and prevent bugs from entering the building when opened.

Police Dept Storage Building

CITY OF DES MOINES
2016 -2021 CAPITAL IMPROVEMENT PLAN
 (Amount in Thousands)

Police Dept Storage Building	310	Summary Project Description:
CIP Category: Building Facility Project		Construction of a new building behind the existing City Shop and Engineering offices to store property seized by police actions.
Managing Department: Plan, Build & PW Admin		

Justification/Benefits: Police currently store their seized property in the warehouse behind the City Shop and Engineering offices. This causes other City equipment to be stored elsewhere. This new building will accommodate the PD needs and will allow for better usage of the existing storage building.

SJU Equipment, Irrig and Landscape

CITY OF DES MOINES
2016-2021 CAPITAL IMPROVEMENT PLAN
 (Amount in Thousands)

SJU Equipment, Irrig and Landscape	310	Summary Project Description:
CIP Category: Park Facility Projects		Add play equipment, new irrigation, bring in topsoil to level the grass area and hydroseed over the topsoil.
Managing Department: Parks, Recr & Sr Services		

Justification/Benefits: The existing irrigation system is old and has been repaired many times. The grass area has quite a bit of moss from prior leaks. This high use park does not have play equipment for use by the neighborhood and the thousands of annual visitors using the facility for sports leagues and tournaments.

North Lot & Beach Park Bulkheads

Justification/Benefits: Bulk heads are aged and damaged by storm activity which require periodic spot rebuilding. Replacing the bulkheads will provide long-term protection with lower maintenance costs.

Capital Improvement Plan 2015 - 2020 69

Redondo Floats

**CITY OF DES MOINES
2016-2021 CAPITAL IMPROVEMENT PLAN
(Amount in Thousands)**

Redondo Floats	310	Summary Project Description:
CIP Category: Waterfont Facility Project		Replace the last of the old floats. Demolish the old concrete brow and replace with a new one that would accommodate the new floats and increase the width of the ramp by 3 feet. Replace all the pile hoops with a better design and clean up rock revetment on both sides of the ramp.
Managing Department: Marina		Float \$15,000; Concrete work \$75,000; new hoops \$10,000.

Justification/Benefits:

Redondo Restroom & Plaza

**CITY OF DES MOINES
2016 -2021 CAPITAL IMPROVEMENT PLAN
(Amount in Thousands)**

Redondo Restroom & Plaza	310	<i>Summary Project Description:</i>
CIP Category: Waterfont Facility Project Managing Department: Marina		Demolish existing restroom and replace with smaller pre-fab structure across the street. Replace restroom foundation with surface similar to rest of plaza and add railings. \$250,000 for pre-fab restroom and \$150,000 for ground restoration.

Justification/Benefits: The existing restrooms are 35 years old and are functionally obsolete. The restrooms are built on a pier with all of the plumbing hanging below the structure where it can and has been destroyed by storms.

Marina Fishing Pier Restrooms

CITY OF DES MOINES
2016 -2021 CAPITAL IMPROVEMENT PLAN
 (Amount in Thousands)

Marina Fishing Pier Restrooms 310

CIP Category: Waterfont Facility Project

Managing Department: Marina

Summary Project Description:

Demolish existing restroom and shower building located next to Marina office and the existing restrooms located near the fishing pier and replace them with 6 module unisex toilet, sink, shower units at a location centrally located to both areas but which will be outside (and therefore not conflict with) the Marina Zone 2 (Economic Development Zone). The unisex style units would include a toilet and sink in each unit and at least two units would also include a shower that would be operated with tokens issued by the Marina office.

Justification/Benefits: Existing restrooms are significantly deteriorated, are at the end of life and need to be replaced. These restrooms are for public access (including patrons of the marina guest moorage).

Redondo Fishing Pier Replace Decking

**CITY OF DES MOINES
2016 -2021 CAPITAL IMPROVEMENT PLAN
(Amount in Thousands)**

Redondo Fishing Pier Replace Decking 310

CIP Category: Waterfont Facility Project

Managing Department: Marina

Summary Project Description:

Replace the wood decking with a concrete deck. Repair pile caps and additional piling where needed in conjunction with installation of the concrete deck.
12 New piles \$100,000; Demo and replace deck \$100,000 plus contingency.

Justification/Benefits: The Pier is now 35 years old and the wood decking has reached the end of its useful life. Concrete decking is easier and cheaper to maintain as well as providing a much safer walking surface.

Driver Speed Feedback Signs

CITY OF DES MOINES
2016-2021 CAPITAL IMPROVEMENT PLAN
(Amount in Thousands)

Driver Speed Feedback Signs	319,609	Summary Project Description: Install permanent radar speed signs which show vehicle speed along with the posted speed limit at arterial locations to be determined. One installed at 20th Ave S. in 2014. CIP Category: Transportation - Operating Project Managing Department: Plan, Build & PW Admin
-----------------------------	---------	---

Justification/Benefits: Driver Speed Feedback signs have been shown to potentially reduce speeds by a small amount and bring awareness to the motoring public. This type of traffic control is better suited for arterials instead of local roads since it does not introduce a vertical or horizontal change in the roadway geometry associated with neighborhood traffic calming techniques such as speed bumps or traffic circles.

PROJECT SCOPE		ANNUAL ALLOCATION									
Expenditures	Total Budget	Project to Date 12/31/14	Scheduled Year 2015	Plan Year 2016	Plan Year 2017	Plan Year 2018	Plan Year 2019	Plan Year 2020	Plan Year 2021

Guardrail Program

Justification/Benefits: This program is specifically intended to target roadside safety on the City's street system. These locations are where guardrail is warranted (determined by the American Association of State Highway and Transportation Officials - AASHTO - Roadside Design Guide and City Policy) but where none exists, and where the existing guardrail does not meet current design standards and should be upgraded to enhance safety. Vehicle impact with substandard guardrail installations can potentially increase the severity of the collision.

Funding Sources		Total Budget
ASE (Automatic Speed Enforcement)	GP X-fer	75

Pavement Preservation

CITY OF DES MOINES
2016 -2021 CAPITAL IMPROVEMENT PLAN
 (Amount in Thousands)

Pavement Preservation	319,100	Summary Project Description:
CIP Category: Transportation - Operating Project		Maintain and preserve the integrity of the City's existing roadway surfaces of approximately 5 centerline miles per year through a combination of pavement rehabilitation measures, such as chip seals, patches and overlays. 2016 includes \$40K for city-wide pavement condition inventory study.
Managing Department: Plan, Build & PW Admin		

Justification/Benefits: The City's Comprehensive Transportation Plan has identified the Pavement Management Program as a high priority. A major component of this program is the yearly pavement maintenance and rehabilitation projects. These projects are intended to protect and preserve the surface condition, help maintain the structural integrity, and restore texture and skid resistance to the roadway surface. With proper maintenance, asphalt pavement has a design life of 20 to 25 years. There are approximately 100 centerline miles of roadway. Given the design life of pavement, the Pavement Management Program should strive to maintain at least 4 to 5 centerline miles of roadway each year.

Sidewalk Program

CITY OF DES MOINES
2016 -2021 CAPITAL IMPROVEMENT PLAN
 (Amount in Thousands)

Sidewalk Program	319,120	Summary Project Description:
CIP Category: Transportation - Operating Project		Replace sidewalks throughout the city. This program targets locations that are in significant need of repair or which do not meet current standards. Typical locations for repair include curb, gutter, sidewalk, asphalt paths and driveway approaches. The program prioritizes projects near schools, in commercial areas, and locations with high amounts of pedestrian traffic. Special consideration is given to locations with past pedestrian accident history and where citizen complaints are received.
Managing Department: Plan, Build & PW Admin		

Justification/Benefits: Provides safer pedestrian mobility and reduces liability to city from substandard sidewalks.

Marine View Dr Roundabout

CITY OF DES MOINES
2016-2021 CAPITAL IMPROVEMENT PLAN
 (Amount in Thousands)

Marine View Dr Roundabout **319.608**

CIP Category: Transportation - Capital Project

Managing Department: Plan, Build & PW Admin

Summary Project Description:

Re-align intersection and install round-a-bout at the intersection of Marine View Drive and S 240th Street.

Justification/Benefits: The project will install a modern round-a-bout at this intersection which will reduce crash severity for all users, allowing safer mergers into circulating traffic, and provide more perception time for all users due to the lower vehicle speeds. There will be fewer overall conflict points and no left-turn conflicts. An environmental benefit minimizes delays with infrequent stops being required during off-peak periods. The improvement will provide an opportunity for pedestrian crossings of Marine View Drive under slower vehicle speed conditions. The circular island provides an opportunity for landscaping and/or gateway feature to enhance the community.

Opportunity for Anticipating and/or Gateway Feature to Enhance the Community:

Barnes Creek Trail/SR 509 Right of Way

CITY OF DES MOINES
2016 -2021 CAPITAL IMPROVEMENT PLAN
(Amount in Thousands)

Barnes Creek Trail/SR 509 Right of Way **319,345**

Summary Project Description:

SR 509 right-of-way from south 216th Street to Kent-Des Moines Road.

CIP Category: Transportation - Capital Project

Managing Department: Plan, Build & PW Admin

Justification/Benefits: The need for extension of roadways, the Barnes Creek Trail, storm water improvements and other public facilities along the Historic SR509 right of way between Kent Des Moines Road and S. 216th Street is identified in the City of Des Moines Comprehensive Transportation Plan, 2009 and the City of Des Moines Highest and Best Use Analysis of the Historic SR 509 Corridor, 2009. The analysis divided the corridor into three segments assessing the City's future needs. This right of way was owned by the Washington State Department of Transportation.

South 268th Street Sidewalk

CITY OF DES MOINES
2016 -2021 CAPITAL IMPROVEMENT PLAN
 (Amount in Thousands)

South 268th Street Sidewalk **319,614**

CIP Category: Transportation - Capital Project

Managing Department: Plan, Build & PW Admin

Summary Project Description:

Install sidewalks on both sides of South 268th Street between 16th Ave South and Pacific Highway South.

Justification/Benefits: S. 268th Street is a Neighborhood Collector Arterial connecting Pacific Highway South and 16th Avenue South. Currently there are open ditch sections on the north and south sides of 268th and no existing sidewalks west of 19th Ave South. South 268th Street is also used by elementary students to walk to Woodmont Elementary on 16th Ave South.

16th Ave - Seg 5A

CITY OF DES MOINES
2016 -2021 CAPITAL IMPROVEMENT PLAN
 (Amount in Thousands)

16th Ave - Seg 5A	319,301	Summary Project Description:
CIP Category: Transportation - Capital Project		South 272nd Street to approximately 1000 feet south of S 272nd Street. Install curbs, gutters, sidewalks, enclosed drainage system and bike lanes along both sides of the street. Improve existing lighting and install left turn lane. Cost estimates reflect overhead utilities. Underground utilities would be a significant increase. This project coordinates with Segment 5B.
Managing Department: Plan, Build & PW Admin		

Justification/Benefits: The need for pedestrian facilities is identified in the City's Comprehensive Transportation Plan and 6 Yr TIP. This corridor has numerous single-family developments that generate pedestrian traffic along the shoulder of the road. It is used to access schools, parks, churches and shopping areas. 16th Ave is classified as a principal arterial and is identified as a pedestrian walkway route. Future growth will highlight the need for separated pedestrian facilities. This project also improves mobility and safety by adding left turn lanes and improving street lighting.

South 216th - Segment 3

CITY OF DES MOINES
2016-2021 CAPITAL IMPROVEMENT PLAN
 (Amount in Thousands)

South 216th - Segment 3 **319,334**

Summary Project Description:

Widen roadway to provide center turn lane, bike lanes, curb, gutter and sidewalks. If grant is unavailable then debt financing would be required.

CIP Category: Transportation - Capital Project

Managing Department: Plan, Build & PW Admin

Justification/Benefits: The need for pedestrian facilities along South 216th Street is identified in the City's Comprehensive Transportation Plan and the Six Year Transportation Improvement Plan. South 216th Street has numerous multi-family developments that generate pedestrian traffic along the shoulder of the road. Pedestrians use this route to access bus stops, city buildings, and the Pacific Highway and Marine View Drive corridors.

CITY OF DES MOINES
2016-2021 CAPITAL IMPROVEMENT PLAN
 (Amount in Thousands)

South 240th Street Improve - Seg 1 **319,206**

Summary Project Description:

Widen roadway to three lanes and provide a continuous center turn lane, bike lanes, transit stops, curb, gutter and planters.

CIP Category: Transportation - Capital Project

Managing Department: Plan, Build & PW Admin

Justification/Benefits: The need for pedestrian and bicycle facilities along South 240th Street is identified in the City's Comprehensive Transportation Plan and the Six Year Transportation Improvement Plan. South 240th Street has residential properties and Highline College that generate pedestrian and bicycle traffic along the shoulder of the road. Pedestrians use this route to access bus stops, Highline College, and the Pacific Highway Corridor. Roadway widening is needed to increase capacity as well as develop a complete street serving vehicles pedestrians, bicycles and transit.

Dock Electrical Replacements

CITY OF DES MOINES
2016 -2021 CAPITAL IMPROVEMENT PLAN
 (Amount in Thousands)

Dock Electrical Replacements	C5.ST.5A.13.01	Summary Project Description:
CIP Category: Marina Capital Improvements		Install new shore power pedestals and distribution wiring on docks H,I,J,K and L.
Managing Department: Marina		

Justification/Benefits: The new electrical wiring will reduce the risk of fire as well as provide upgraded service to Marina tenants. These docks are 45 years old and still have the original shore power boxes and wiring. Most of the shore power boxes have been upgraded to 30 amps from the original 15 amp service to meet the demands of the new boats but the wiring has not been replaced with larger wire size to accommodate the increased demand.

Barnes Crk/Kent-Des Moines Rd Culvert

CITY OF DES MOINES
2016 -2021 CAPITAL IMPROVEMENT PLAN
 (Amount in Thousands)

Barnes Crk/Kent-Des Moines Rd Culvert	CIP.14.15.STR	Summary Project Description:
CIP Category: Surface Water Mgmt		Project improvements will include the installation of 80 to 100 feet of 48-inch or 60-inch diameter culvert or possibly the construction of a box culvert, depending on the method of construction and current fisheries requirements. Due to the depth of culvert and the high traffic of Kent-Des Moines Road, use of boring or other trench-less technology will be explored. The dramatic elevation change from upstream to downstream and the need to moderate velocity for fish passage may require that a special energy dissipater and/or fish ladder be installed at the culvert outlet.
Managing Department: Plan, Build & PW Admin		

Justification/Benefits: This culvert replacement is needed to convey peak predicted flows without flooding Kent-Des Moines Road. At this point a new 42- to 48-inch reinforced concrete pipe culvert is planned to replace the existing undersized culvert. However, the new pipe size will need to be designed to meet current Hydraulic Code to allow both high- and low-flow fish passage. An energy dissipater will be included at the downstream end of the culvert (with a fish ladder). This project was identified in the Lower Massey Creek Basin Plan and Alternative Analysis. The timing of this project will be based on the outcome of a culvert survey made in 2004 to determine the condition of the culvert.

Lower Massey Creek Channel Modifications

CITY OF DES MOINES
2016 -2021 CAPITAL IMPROVEMENT PLAN
 (Amount in Thousands)

Lower Massey Creek Channel Modifications **451.821**

CIP Category: Surface Water Mgmt

Managing Department: Plan, Build & PW Admin

Summary Project Description:

This project involves widening the Massey Creek channel between 10th Avenue South and the Taxo Time property east of Marine View Drive, berming the north side of the creek, constructing a sheetpile floodwall on the south side of the creek, installing a small pump station, installing native plantings along the stream, removing invasive species and installing stream fish habitat features such as woody debris, stream boulders and bank logs. External funding is provide from King County with two grants: \$200K Flood Reduction Grant and \$196 Regional Opportunity Grant.

Justification/Benefits: The purpose of the improvements is to enhance habitat along this portion of Massey Creek, improve flood capacity of the channel and reduce intersection flooding at Kent-DesMoines Road and Marine View Drive. Land for this project was purchased in 1998. This project is identified in the 1992 Massey Creek Basin Plan and the 1994 Lower Massey Creek Flood Alternative Analysis.

24th Ave Pipeline Replacement/Upgrade

CITY OF DES MOINES
2016 -2021 CAPITAL IMPROVEMENT PLAN
 (Amount in Thousands)

24th Ave Pipeline Replacement/Upgrade **451.815**

CIP Category: Surface Water Mgmt

Managing Department: Plan, Build & PW Admin

Summary Project Description:

Replacement of exiting 12-inch storm drainage system with approximately 500 feet of 36 inch pipe and 3 manhole structures. This project is done in conjunction with the Midway SRTS project.

Justification/Benefits: During major storms the drainage system along the east side of 24th Avenue between S. 226th and S 227th overflows to the pipe system on the west side. These overflows bypass the trunk system which conveys flows to the City Park detention facility and flood properties south of 227th south of Pacific Middle School. This project is recommended in the 1992 Massey Creek Basin Plan.

1st Ave Pond Expansion

CITY OF DES MOINES
2016-2021 CAPITAL IMPROVEMENT PLAN
 (Amount in Thousands)

1st Ave Pond Expansion **451,823**

CIP Category: Surface Water Mgmt

Managing Department: Plan, Build & PW Admin

Summary Project Description:

Expand existing pond at 1st Ave and 4th Ave S, North Hill Area by 1.9 acre feet.

Justification/Benefits: The existing 199th trunk line was reviewed for capacity in the Normandy Park Comprehensive Plan - Normandy Creek/Upper Basin. The trunk line was found to be undersized (for most storms) for 200 feet, aged for the remaining sections and does not meet current design standards. The increased size will alleviate local flooding that occurs in the upper basin of Normandy Creek. In order to provide mitigation for downstream impacts, the 1st Avenue Pond that is currently owned by Normandy Park will need to be expanded. An interlocal agreement will need to be made with Normandy Park for the expansion project as well as for the long-term maintenance of the facility. Roughly 50% of the basin area is within Des Moines city limits. The cost for the land (\$42,500 purchased in 2000) has been deducted from Des Moines' share of the cost.

5th Ave/212th Street Pipe Upgrade

CITY OF DES MOINES
2016 -2021 CAPITAL IMPROVEMENT PLAN
 (Amount in Thousands)

5th Ave/212th Street Pipe Upgrade	451	Summary Project Description:
CIP Category: Surface Water Mgmt		Replacement of approximately 2,630 feet of emp pipe with new 1,700 feet of 12-inch pipe and 930 feet of 18-inch pipe in the North Hill area in the vicinity of 212th Street and 5th Avenue South.
Managing Department: Plan, Build & PW Admin		

Justification/Benefits: This project will replace over 2,000 feet of aged corrugated metal pipe and upgrade over 900 feet of pipe to 18-inch pipe that has inadequate capacity during major storms. During two major storm events in 2013 and 2014, the pipe system overflowed creating significant erosion near the stairway at 212th Street and Des Moines Memorial Drive. The project will connect to the DMMD pipe upgrade installed in 2014. This project is identified as a high-priority project (CIP-16) in the 2015 Stormwater Comprehensive Plan.

N. Fork McSorely Ck Diversion		451
CIP Category: Surface Water Mgmt		
Managing Department: Plan, Build & PW Admin		
Summary Project Description:		
This project proposes to install a diversion structure on 20th Ave. S. between S. 244th Pl and 245th Pl. From the diversion structure a new 24-in storm bypass pipe will be installed on the west side of 20th Avenue, turn west and follow the south side of 245th Pl and then to McSorley Creek. This project also includes pavement restoration, replacement of curb and gutter and minimal dredging of McSorely Creek and bank stabilization near the discharge point of the bypass pipe.		

Justification/Benefits: When the Des Moines Trace Subdivision was developed in the early 1980's a segment of the north fork of McSorely Creek was relocated to a narrow rock lined channel within a 15-foot wide drainage easement along the north side of the subdivision (lots 14 through 25). Over time this channel has filled in with sediment and is overgrown with canary reed grass causing the channel to overtop and flood both the subdivision lots and the adjacent properties to the north. This project will provide a flow diversion whereby normal flows will continue into the creek section but high flows are bypassed to a lower point in the channel. As part of this project, the channel section across lots 17-25 will be dredged. This is a high-priority project (CIP-30) identified in the 2015 SWM Comprehensive Plan.

6th Ave/239th Pipe Replacement

CITY OF DES MOINES
2016 -2021 CAPITAL IMPROVEMENT PLAN
 (Amount in Thousands)

6th Ave/239th Pipe Replacement **451**

CIP Category: Surface Water Mgmt

Managing Department: Plan, Build & PW Admin

Summary Project Description:

This project proposes to replace the existing 8-inch drainage system on the west side of 6th Ave S. and connect to the drainage system on 239th Street. This project will also install a new 18-inch HDPE storm drain outfall from 239th St. to Puget Sound. The stairway above the outfall pipe will be replaced as part of this project.

Justification/Benefits: During major storms the drainage system the small 8-inch conveyance system within 6th Avenue S. is overcome and overflows into the properties on the west side of the street. In addition, the outfall pipe from S. 239th is comprised of coated corrugated steel pipe that has separated in the lower section of the pipe that leads over the bank to the Sound. This project proposes to upgrade the 8-inch pipe on 6th Avenue to standard 12-inch and replace the corrugated steel outfall pipe with HDPE pipe. This project also proposes to replace the stairway that is located above the outfall pipe. This is a high-priority project (CIP-39) listed in the 2015 SWM Comprehensive Plan.

14th Ave (268th to 272nd) Pipe Upgrade

CITY OF DES MOINES
2016 -2021 CAPITAL IMPROVEMENT PLAN
 (Amount in Thousands)

14th Ave (268th to 272nd) Pipe Upgrade **451**

CIP Category: Surface Water Mgmt

Managing Department: Plan, Build & PW Admin

Summary Project Description:

This project proposes to upgrade the ditch and driveway culvert system along the west side of 14th Avenue with a new storm pipe as well as replace the existing culverts below 272nd Street and 268th Street. This project includes 900 linear of 36-inch diameter pipe, 6 manhole structures, an outfall dissipator, and minimal road restoration.

Justification/Benefits: The culvert below 272nd Street is not sufficiently sized and is too shallow. During major storms the pipe system leading from the Redondo Riveria subdivision (south of 272nd) backs up creating significant flooding within the subdivision particularly in the vicinity of 275th Place and 15th Place. North of 272nd St., the drainage system on 14th Avenue is comprised of a shallow ditch system with driveway culverts that are easily blocked exacerbating the problem south of 272nd Street. There is also significant erosion due to a drop of grade at the downstream end of the culvert at S. 268th Street. This project proposes to replace the culverts at 272nd Street and 268th Street and install a new 36-inch pipe system on the west side of 14th Avenue from 272nd Street to 270th Street. This project is a high-priority project (CIP-36) listed in the 2015 SWM Comprehensive Plan.

216th Pl./ Marine View Dr. Pipe Upgrade

**CITY OF DES MOINES
2016-2021 CAPITAL IMPROVEMENT PLAN
(Amount in Thousands)**

216th PL./Marine View Dr. Pipe Upgrade **451**

CIP Category: Surface Water Mgmt

Managing Department: Plan, Build & PW Admin

Summary Project Description:

This project proposes to upgrade the ditch along Des Moines Memorial Drive with 300 linear feet of new 18-inch diameter pipe and connecting to 170 linear feet of new larger 24-inch diameter storm system crossing the intersection of MVD (216th Place). The project also proposes to pipe the ditches on the west side of 6th Avenue connecting to the new pipe system on DMMD.

Justification/Benefits: Previous upgrades have occurred within the storm system downstream of the project and west of the project along 216th Place. This project proposes to upsize the 18-inch crossing at Marine View Drive to 24-inch as well as pipe the ditch along Des Moines Memorial Drive. Along the storm segment below MVD near the border of Normandy Park and Des Moines is a buried inaccessible structure that may become blocked with debris and cause backup and flooding of the intersection and overflow to areas of recent landslide activity. This project will be coordinated with the City of Normandy Park (cost share for the portion of project within Normandy Park not shown). This is a high-priority project (CIP-17) listed in the 2015 SWM Comprehensive Plan.

KDM /16th Avenue Pipe Replacement

CITY OF DES MOINES
2016 -2021 CAPITAL IMPROVEMENT PLAN
 (Amount in Thousands)

KDM /16th Avenue Pipe Replacement **451**

CIP Category: Surface Water Mgmt

Managing Department: Plan, Build & PW Admin

Summary Project Description:

Replace approximately 300 feet of existing roadside ditch (east of 16th Avenue) along KDM Road with 24-inch storm pipe and connect to existing 18-inch culvert crossing KDM Rd at 16th Avenue. Install 50 feet new 24-inch storm drain southwest of KDM Road connecting to existing 18-inch culvert crossing and replace 350 feet of existing 24-inch corrugated metal pipe with larger 36-inch pipe downstream of the culvert crossing.

Justification/Benefits: During major storm events the capacity of the existing drainage system along Kent-Des Moines Road and the highway crossing will be exceeded causing runoff to overflow across KDM and flood the property downstream. In addition, the system on that property (located within a public drainage easement) that intercepts flows is also insufficiently sized and is prone to overtopping. This project proposes to replace the undersized pipes with 24-inch and 36-inch diameter pipes. This is a high-priority project (CIP-25A) listed in the 2015 SWM Comprehensive Plan and to be coordinated with projects CIP-4 and CIP-25B that would take a portion of the flows west to a new outfall pipe at Barnes Creek (rather than upsizing the 18-inch corrugated aluminum crossing below KDM Road.)

DMMD 208th to 212th Pipe Project

CITY OF DES MOINES
2016-2021 CAPITAL IMPROVEMENT PLAN
 (Amount in Thousands)

DMMD 208th to 212th Pipe Project	451	Summary Project Description:
CIP Category: Surface Water Mgmt		Replace approximately 1500 feet of existing roadside ditch and corrugated metal pipe along the west side of Des Moines Memorial Drive from 208th Street to 212th Street. Includes installation of 14 manhole structures and minimal road restoration.
Managing Department: Plan, Build & PW Admin		

Justification/Benefits: The ditch and culvert system along the west side of Des Moines Memorial Drive is insufficient to convey a 25-year storm causing water to pool in the south bound lane of Des Moines Memorial Drive. This project proposes to replace the existing corrugated metal pipe and ditch system with approximately 1500 feet of new 18-inch pipe that would connect to the pipe replacement work made on Des Moines Memorial Drive in 2014. This project is a high priority project (CIP-18) listed in the 2015 SWM Comprehensive Plan.

GLOSSARY OF TERMS

ADA: Acronym for “Americans with Disabilities Act.”

ARRA: Acronym for “American Recovery and Reinvestment Act” or commonly referred to as *The Stimulus* or *The Recovery Act*

ASARCO: Acronym for “American Smelting and Refining Company.”

ASE: Acronym for “Automated Speed Enforcement” Program, which addresses traffic safety in school zones: 1) Woodmont Elementary School (16th Avenue South); and 2) Midway Elementary School and Pacific Middle School (24th Avenue South).

BFP: Boating Facilities Program state grant, administered by the Washington State Recreation and Conservation Office (RCO).

BRAC: Acronym for “Bridge Replacement Advisory Committee,” which advises WSDOT’s Highways and Local Programs (H&LP) Director to help inform the selection of bridge projects for funding from WSDOT’s Highway Bridge Program (HBP).

CDBG: Acronym for “Community Development Block Grant.”

CIP: Acronym for “Capital Improvement Plan.”

CMAQ: Acronym for “Congestion Mitigation and Air Quality.”

CTED: Acronym for “Community, Trade and Economic Development.”

Capital Expenditure: An expenditure which leads to the acquisition of a physical asset with a cost between \$5,000 and \$25,000 and a useful life of at least one year. Such expenditures are charged through an individual department’s operating budget and do not include those provided for in the Capital Improvement Plan project budget.

Capital Facility: A structure, improvement, piece of equipment or other major asset, including land, that has a useful life of at least five years. Capital facilities are provided by or for public purposes and services.

Capital Improvement: A project to create, expand, or modify a capital facility. The project may include design, permitting, environmental analysis, land acquisition, construction, landscaping, site improvements, initial furnishings and equipment and studies related to need and implementation. The project cost must exceed \$25,000 and have a useful life of five years.

Capital Improvement Plan: An approach or technique for identifying and forecasting capital outlay decisions that a government expects to make over a six year period.

Capital Outlay: Expenditures that result in the acquisition of or addition to capital assets.

Capital Project: The largely one-time cost for acquisition, construction, improvement, replacement or renovation of land structures and improvements thereon.

Comprehensive Plan: A method to utilize and strengthen the existing role, processes, and powers of local governments to establish and implement comprehensive planning programs which guide and control future development.

Contingency: A budgetary reserve set aside for emergency or unanticipated expenditures.

DMLF: Acronym for “Des Moines Legacy Foundation.”

DMMD: Acronym for “Des Moines Memorial Drive.”

Debt: An obligation resulting from the borrowing

Debt Service: The payment of principal and interest on borrowed funds and required contributions to accumulate monies for future retirement of bonds.

Debt Reserve: Monies restricted for the payment of principal and interest on outstanding bonds, usually based on the average annual debt service due on the outstanding bonds. A bond covenant that provides additional security for bond holders.

DOE: Acronym for “Department of Ecology.”

EDA: Acronym for “Economic Development Administration.”

EECBG: Acronym for “Energy Efficiency and Conservation Block Grant Program” which provides funds used for energy efficiency and conservation programs and projects community wide, as well as renewable energy installations on government buildings.

Expenditure/Expense: This term refers to the outflow of funds paid for an asset obtained or goods and services obtained.

FEMA: Acronym for “Federal Emergency Management Agency.”

FHWA: Acronym for “Federal Highway Administration.”

Fund: A fiscal/accounting entity that is established to accomplish specific objectives and carry out specific activities. The operation of each fund is accounted for by providing a separate set of self-balancing accounts that comprise its assets, liabilities, fund equity, revenues and expenditures.

Fund Balance: Fund equity that reflects the accumulated excess of revenues and other financing sources over expenditures and other uses.

General Fund: The General Fund accounts for all revenues and expenditures not required to be accounted for in another fund. As is usual in state and local governments, it is the largest and most important accounting entity of the City.

General Governmental: The term describes funding and programs related to activities such as public safety, parks, transportation, and public health. Revenues to support such activities are generated primarily from taxes and user fees.

General Obligation Bonds: Bonds that finance a variety of public projects that are backed by the full faith and credit of the issuing government.

GIS: Acronym for “Geographical Information System.”

GO: Acronym for “General Obligation” Bonds.

Grant: A contribution by Federal, State, and other jurisdiction or organization to support a particular function.

HES: Acronym for “Hazard Elimination Safety.”

HOV: Acronym for “High Occupancy Vehicle.”

HSPF: Acronym for “Hydrological Simulation Program – Fortran.”

HVAC: Acronym for “Heating, Ventilating, and Air Conditioning.”

IAC: Acronym for Washington State Interagency Committee for Outdoor Recreation. This agency now is called Recreation and Conservation Office (RCO).

ILA: Acronym for “Interlocal Agreement”.

Impact Fees: A payment of money imposed by the City upon development activity as a condition of issuance of a building permit to pay for public facilities needed to serve new growth and development, and to mitigate the impacts of the development activity on the existing public facilities.

Infrastructure: The physical assets of a government (e.g., streets, bridges, water, sewer, storm systems, public buildings, parks, etc.).

In-Lieu: A payment alternative for funding capital expenditures.

Interfund Transfer: The movement of monies between funds of the same government entity.

ISTEA: Acronym for “Intermodal Surface Transportation Efficiency Act of 1991”.

KDM: Acronym for “Kent Des Moines” Road.

Level of Service: A quantifiable measure of the amount of public facility that is provided. Typically, measure of levels of service are expressed as ratios of facility capacity to demand.

LID: A Local Improvement District, or special assessments made against certain properties to defray part or all of the cost of a specific improvement or service deemed to primarily benefit those properties.

MCI: Acronym for “Municipal Capital Improvement” Fund.”

Ordinance: A formal legislative enactment by the governing body of a municipality. If it is not in conflict with any higher form of law, such as a state statute or constitutional provision, it has the full force and effect of law within the boundaries of the municipality to which it applies.

POS: Acronym for “Port of Seattle.”

PSE: Acronym for “Puget Sound Energy.”

Pac Hwy: Pacific Highway South.

Park In-Lieu Fees: A voluntary payment of money from a subdivision or multi-family development as an alternative to providing open space or park land for recreation purposes.

Pay-As-You-Go Basis: A term used to describe the financial policy of a government that finances all of its capital outlays from current revenues rather than borrowing. A government that pays for some improvements from current expenses and by borrowing is said to be on a modified pay-as-you-go basis.

Program: A distinct function of city government provided to the public or a function providing support to the direct services of other city departments.

Proprietary: The term describes funding and programs related to government owned public facilities that serve the public such as water, sewer, and surface water utilities, or recreation facilities such as marinas. Revenues to support such activities are generated primarily from user rates.

Public Facilities: Streets, roads, highways, bridges, sidewalks, street and road lighting systems, traffic signals, domestic water systems, storm and sanitary sewer systems, and parks and recreational facilities, including the necessary ancillary and support facilities under the ownership of the City of Des Moines or other government entity.

Public Services: Fire protection and suppression, law enforcement, public health, education, recreation, environmental protections, and other governmental services.

PWTF Loan: Acronym for “Public Works Trust Fund Loan”.

RAB: Acronym for “Round-a-bout.”

RCO: The Washington State Recreation and Conservation Office (formerly the Office of the Interagency Committee, also known as IAC).

REET: Acronym for “Real Estate Excise Tax”.

ROW: Right-of-Way

Resolution: A special or temporary order of a legislative body; an order of a legislative body requiring less legal formality than an ordinance or statute.

Revenue: Money that flows into the local government. It is recurring if it is received on a consistent basis (e.g., sales taxes and property taxes) and nonrecurring if it is received irregularly (e.g., federal and state grants).

Revenue Bonds: Revenue bonds are used for such public projects that will generate revenue producing facilities. Unlike general obligation bonds, revenue bonds are not backed by the full financial resources of the jurisdiction. Instead, security is offered by pledging revenues generated from the new facility.

SJUM: Acronym for "Steven J. Underwood Memorial" Park.

SRTS: Acronym for "Safe Routes to School."

STP: Acronym for "Surface Transportation Program."

SWM: Acronym for "Surface Water Management" Fund."

Tax: Compulsory charge levied by a government to finance services performed for the common benefit.

TEA21: Acronym for "Transportation Equity Act for the 21st Century."

TIA: Acronym for "Transportation Improvement Account."

TIB: Acronym for "Transportation Improvement Board," an independent state agency that makes and manages street construction and maintenance grants throughout Washington State.

TPP: Acronym for "Transportation Partnership Program."

User Fee: The payment of a fee for a direct receipt of a public service by the party benefiting from the service.

WRIA: Acronym for "Water Resource Inventory Area."

WSDOT: Acronym for "Washington State Department of Transportation."
